

What Is Emergency Lighting?

Emergency lighting, which is sometimes referred to as escape lighting, ensures that you, your staff, your customers and members of the public can find their way through and from your premises in the event of a power failure.

Do You Need Emergency Lighting?

Whether you have one staff member or one thousand, if you allow people access to your premises before 09:00 or after 15:45, the law requires you to have emergency lighting.

The legal requirement is mandatory and failure to comply can lead to prosecution under criminal law.

Already Have Emergency Lighting Installed?

Did you know that it is also a legal requirement to maintain your emergency lighting and record that it has been tested?

Your emergency lighting should be tested:

- Daily (Visual)
- Weekly
- Monthly
- Annually

All testing should be recorded in your logbook with the exclusion of the daily testing.

How Can We Help?

At Best Electrical we have a dedicated compliance division, whose team of multi disciplined engineers are ready to install and maintain your emergency lighting.

All of our engineers are employed directly and we operate a strict no sub-contractor policy.

What's more we provide free emergency lighting logbooks and staff training for all systems installed and maintained by us.

What Does It Cost?

Due to all buildings differing in shape, size and intended use, a survey would be required for all installations and maintenance.

All surveys and quotations are provided free of charge.

If you require any further information regarding emergency lighting, please do not hesitate to give us a call.

Who Are We?

Best Electrical are an Electrical Contracting Company who are based in Hertfordshire. A core area of expertise is Electrical Compliance; we carry out various types of electrical safety inspections, surveys and reports throughout the country on a daily basis.

Please feel free to contact us for an instant quote, or if you require any further information on any of our other services.
