

Fire alarm systems are installed to protect you, your staff, customers and your property. They provide early warning in the event of a fire.

Do You Need A Fire Alarm?

Conduct the following simple test to establish whether or not you require a fire alarm.

- Can you from any exit door within the building quickly let the other occupants know there may be a fire? You would not be able to re-enter the building to do so.
- Can you, from every part of the building, see your escape route clearly?
- If anyone sleeps in or above the premises would they be quickly notified if there was a fire?

If you answered no to any of the above questions then it is a requirement that you have a fire alarm installed. Failure to comply with the statutory requirements could lead to criminal prosecution.

What Are My Options?

There are many different systems available in the market place from standard conventional systems for smaller premises, fully addressable systems for larger premises and wireless systems which cover all buildings. Added benefits for choosing a wireless system are installations are extremely faster and there are no unsightly cables or containment on show. Wireless systems are fully compliant with the BS5839 and EN54-25. You need to be aware that battery operated and domestic mains powered smoke detectors do not make you compliant.

Have You Already Got A Fire Alarm?

Did you know It is also a criminal offence for a fire alarm system not to be kept in good working order. Not having a maintenance contract is not acceptable as defence court.

How Can We Help?

At Best Electrical we have a dedicated compliance division, whose team of multi-disciplined engineers are ready to install and maintain your fire alarm systems.

All of our engineers are employed directly and we operate a strict no sub-contractor policy.

We also provide free fire alarm logbooks and staff training for all systems installed and maintained by us.

What Does It Cost?

Due to all buildings differing in shape, size and intended use, a survey would be required for all installations and maintenance.

All surveys and quotations are provided free of charge.

Who Are We?

Best Electrical are an Electrical Contracting Company who are based in Hertfordshire. A core area of expertise is Electrical Compliance; we carry out various types of electrical safety inspections, surveys and reports throughout the country on a daily basis.

Please feel free to contact us for an instant quote, or if you require any further information on any of our other services.
